Long-Range Transportation Plan and Land Use Plan**

Long-Range Transportation Plan:

- Interest in Transportation from Duluth, MN to Menominee Reservation - for appointment for children that are in care with relative. Children need dental or may be other surgery done. Children are with relative on Reservation and parent would like to be here for surgery.
- Is there a possibility of providing a route to the Gresham area?
- I would like to see bike paths along Hwy VV - going east along the lake. Bike paths on all reservation roads allow people to exercise, somewhat more safely.
- I use to ride the 7 a.m. bus to work at the clinic but because the school children rode it was often late getting to Keshena and I had to use vacation time each day that I was late for work.

Land Use Plan:

- I want to suggest that the MITW Land Use Plan ought to include a "vision statement" that recognizes Grandmother Earth as being a sacred along with the water, trees, and rocks. And that an effort will be made to protect the natural resources. That Menominee People are stewards of the land and they have an inherited duty to protect those resources.
